Numb. 2301

SATURDAY, NOVEMBER 6. 1742.

Journal of the Auſtrian Army in Bohemia, from the 3d to the 20th of October, 1742.

October 3.

HIS Day the Enemy advanced on our Left a ſtrong Detachment of 26 Squadrons, Horſe and Dragoons, in order to cover a Forage they intended amongſt the Villages on their Right. Our Huſſars went immediately to pay their Compliments to this Detachment, and entertain'd them very briskly, till they enter'd their own Camp, with the Loſs of 10 or 12 Men on each Side. The ſame Day Col. Mentzel brought in 130 Priſoners.

On the 4th, the Regiments of Olone, Wirtemberg, Birckenfeld, and St. Ignon, were detach'd under the Command of Count Charles St. Ignon, Lieutenant Field-Marſhal, with Orders to make himſelf Maſter of the Paſſes and Defiles in the Circle of Saatz, to prevent any of the Forces that had ſallied out of Prague advancing that Way. We had the ſame Day Intelligence, that M. Maillebois had ſent the Brigade of the Crown to occupy certain Poſts on the Egra.

On the 5th, we perceived in the Morning that the Enemy had ſtruck their Tents on the Right, and we had ſoon after certain Information, that the Count de Saxe was detached with the Body of Reſerve, to ſupport the Brigade of the Crown. In the Evening we learn'd, that the Enemy had began to remove their Artillery, and that they had taken the Road of Moering in the Upper Palatinate.

On the 6th at Break of Day we were inform'd by Deſerters, that Marſhal Maillebois had entirely abandon'd his ſtrong Caſtle at Pramhoff, in order to retire to Albereick, from whence he took the Road to Egra. The ſame Day Col. Mentzel attack'd a Body of 3 or 4000 Men. As he was much inferior to them in Number, ſo he quickly retired towards an Eminence, to which the Enemy purſued him; but his Artillery, which was planted there, from made them retire; and he, taking Advantage of his Situation, charged them vigorouſly in their Retreat, made ſome hundred Priſoners, and ſent them to the Head-Quarters. The ſame Day we detach'd 300 of the Bohemian Militia, and the like Number of Huſſars, for the Circle of Saatz.

On the 7th, beſides the Priſoners taken on the 6th, there were conducted to our Camp a Brigadier and three French Captains, who were taken within a League of Egra. The ſame Day we detach'd the Regiment of Foot of Neipperg, Kevenhuller's Dragoons, and four Troops of Paſſi's Cuiraſſiers, to re-inforce the Army in Bavaria under Major-General Serbelloni.

On the 8th, upon our having Advice that Marſhal Maillebois arriv'd the Night before at Egra, that he had got together Proviſions for a Fortnight, and intended to continue his March, we decamp'd from Plan and march'd to Konigſwarth, where the Duke of Lorrain fixed his Head-Quarters.

On the 9th, we remained at Konigſwarth, in order to wait for the heavy Baggage, which could not follow the Day before becauſe of the narrow Paſſes and bad Roads. This Day the Priſoners were alſo brought to the Camp.

On the 10th, as we were inform'd that Marſhal Maillebois with his whole Army was at Falkenau, we quitted the Camp at Konigſwarth, and went to occupy another at Toepla, in order to keep a March or two at leaſt before the Enemy.

On the 11th, we remained in our Camp, waiting for the Baggage.

On the 12th, our Army continued its March in five Columns; the Firſt commanded by the Duke of Lorrain, Prince Charles, and Marſhal Konigſegg, the Second by Field-Marſhal Kevenhuller, the third by Field-Marſhal Lobkowitz, the Fourth by Count Hohenembs, General of Horſe; the Body of Reſerve, which made the Fifth, was commanded by Count Bathiani. The Head-Quarters that Day were at Purles, on the 13th at Waltſch, on the 14th at Podhorſan, and on the 15th all the five Columns united near Saatz, in order to wait for M. Maillebois, if he was really bent on joining Broglio.

On the 16th we were inform'd, that while we were at Waltſch Count Saxe with about 9000 Men had puſh'd into the Circle of Saatz, as far as Cadan a Village commanding a Paſs that was of the laſt Importance. Prince Lobkowitz, who with about 5000 Irregular Troops attended the French all the Way on this Side the Egra, had no ſooner Information of this than he immediately paſſed the River, ſurrounded the Town of Cadan, and cut to pieces the French Garriſon which had ſurpriz'd it. Our Head Quarters were now at Schoenhoff, about a Mile and half from Cadan, and the Reaſon we had not occupied that Poſt was, becauſe the Duke of Lorrain thought to have adjuſted all Differences with the Marſhal Maillebois in the Plain before his Camp. The Count de Saxe was overjoy'd at this Opportunity, and preſs'd the Marſhal not to let it ſlip; but it ſeems his Orders were conceiv'd in ſuch Terms as could not juſtify his fighting on his own Motive, and therefore he declin'd it, and after advancing as far as Schlakewerd, reſolv'd not to embarraſs himſelf any longer amongſt Woods and narrow Paſſes, but to march back with all imaginable Diligence towards Egra.

17th. This Day we remain'd in our Camp at Schoenhoffe.

On the 18th, early in the Morning we decamp'd, and march'd back towards the Frontiers of Bohemia. The ſame Day we had Intelligence that a Body of 2000 Horſe and Dragoons had advanc'd as far as Meiſcheck, where they were attack'd by a Detachment of our Huſſars, who killed near 300 Men, and made as many Priſoners. The ſame Day our Huſſars carried off from Joachims-Thal 239 black Cattle, which were intended for the Service of the Enemy's Camp, after diſperſing the Guard that eſcorted them; and another Party of our Huſſars ſent in 100 Priſoners, amongſt whom was a Lieutenant Colonel.

On the 19th, we incamp'd at Lievens, where we no ſooner arriv'd than 80 Priſoners were brought to the Camp; and we were inform'd that the Day before, Prince Eſterhaſi had killed in a Rencounter with the Enemy about 300 Men.

This, all Circumſtances conſidered, muſt have been a moſt painful and dangerous March to the French, and muſt undoubtedly have ruin'd their Army. All the Deſerters agree in reporting, that M. Maillebois and Count Saxe differ frequently; but they alſo agree, that the Marſhal has Reaſon on his Side, ſince if his Army was defeated at any Diſtance from Egra, it would be ſimply impoſſible for him to make any Retreat, conſidering the Country that lies behind him.

Paris, Nov. 5. It is impoſſible to expreſs the Uneaſineſs ſhewn by the People on account of M. Maillebois' Retreat. The laſt Letters from the Army that were publiſh'd bore Date the 12th of laſt Month, and therein he is made to ſay, that the Count de Saxe was ſtill advancing with the Body of Troops under his Command on his Left, and that the Enemy quitted their Poſt with Precipitation on his Approach, ſuch Meaſures being taken for the cutting off their Convoys, and for otherwiſe diſtreſſing the Auſtrian Army, as would quickly oblige them to abandon the Circle of Saatz, and thereby leave all the Paſſages free and open for Marſhal Broglio to join the Army with the Forces under his Command. The News we have ſince receiv'd very fully proves that this muſt have been feign'd here, which ſhews to what low Shifts our great Men have been reduced. His Majeſty has been pleas'd to erect a new Tribunal at the Arſenal, compoſed of Meſſ. Chauvelin, Dagueſſeau, de Freſne, Gilbert des Voiſins, and de Marville. They are to examine the famous Affair of the Sieur Peſtel; as alſo another unlucky Buſineſs relating to a Gentleman of good Family, who has taken it into his Head to entertain a Gang of Smugglers in his Caſtle, and even to fall upon the King's Officers when they purſu'd them thither, in which Fray ſeveral were wounded. This Commiſſion is look'd upon by many with an evil Eye, on a Suppoſition that other Cauſes may be referred to them which in the End may be attended with unthought-of Conſequences, eſpecially with regard to ſuch as have any thing to do with the Revenue.

THE Elements of ALGEBRA, in a New and Eaſy Method, with their Uſe and Application, in the Solution of a great Variety of Arithmetical and Geometrical Queſtions, by General and Univerſal Rules.

To which is prefix'd, An Introduction containing a ſuccinct Hiſtory of this Science.

By Mr. Nathaniel Hammond, *of the* Bank.

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper Introduction to Algebra. Some are ſo very conciſe, as if they were contrived not to teach but introduce a Teacher; others again are larger, but wrote with ſo little Condeſcention to the Underſtandings of ſuch as are altogether unacquainted with the Science, that they are of very little Uſe to thoſe who are moſt inclined to make uſe of them. Whence it comes to paſs, that few find it practicable to make any Progreſs in Algebra without a Maſter, tho' certainly the Science in itſelf is far from ſurpaſſing a clear Head, and a tolerable Underſtanding.

'The Deſign of this Treatiſe, which is of a reaſonable Bulk, and which contains nothing which is not ſolid, and to the Purpoſe, is to aſſiſt ſuch as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; ſo that their Scholars may find Employment in their Abſence; and to enable ſuch as live in Country-Places, and muſt conſequently want all other Tutors, except Books, to acquire ſuch a Skill in this Science, as may enable them to ſpend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiring after Truth habitual.

'The Treatiſe begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation uſed therein. The Author then proceeds to the ſeveral Rules, explaining them carefully and copiouſly in all their various Caſes; ſo that with a moderate Attention it is ſimply impoſſible for a Perſon, who deſires to be Maſter of Algebra, to miſs of his End.

'We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become neceſſary: He profeſſes to have imitated the judicious *Euclid* in this Reſpect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is uſually the moſt fatiguing Part of the Science, viz. The Doctrine of Surds, in the Manner in which it is uſually taught. By the ſame Means he leads his Reader directly to Equations; and, by ſhewing him the Profit he is to reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a ſtrong and rational Foundation, he moves more ſlowly through the reſt of his Work, that whoever follows him, may be obliged to become Maſter of ever Branch of the Art, ſo as to be a compleat Algebraiſt, before he quits his Book, and not a Smatterer.

'Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable *Newton*, are here ſo clearly explained, and their ſeveral Caſes ſo plainly ſet down, and ſo thoroughly explicated, that it may be truly ſaid, there are no where elſe ſuch Inſtructions to be met with. At the Cloſe of the Book, we find abundance of Obſervations, neceſſary for enlightening ſuch Minds as are willing to proceed ſtill farther in analytic Diſcoveries; ſo that conſidering the Compaſs of this Work, and that too is very moderate, it is as complete as poſſibly can be expected: And he who is thoroughly verſed in it, will find no great Difficulties, when he proceeds to ſublimer Studies. The Language is plain and natural, the Book is more copious than any other in Examples, and the Illuſtrations of them are ſo full and clear, that it is impoſſible to miſtake their Meaning.'

By a Phyſician.

London, printed and ſold by the Author's Appointment only at the Gentlewoman's at the Two Blue Poſts in Hanover Yard in the Minories. Price bound 2 s.

Concerning Gleets *and* Seminal Weakneſs *of all Kinds.*

ALL judicious Phyſicians and Surgeons allow, that nothing is more difficult to cure than Stubborn Gleets and Seminal Weakneſſes, whether occaſion'd by too ſevere purging for Venereal Injuries, violent Strains, Pollutio ſui, or any other Cauſe whatever; and that they are dangerous in their Conſequences, as well as difficult to cure, is as certain, ſince they exceedingly weaken the Generative Faculties, infeeble the whole Nervous Syſtem, often bring on Hectick Heats, a Tabes Dorſalis, or Conſumption of the Back, or an Atrophy or Nervous Conſumption, which frequently terminate in Death itſelf.

All ſuch, therefore, who have the Misfortune to be troubled with Old or Stubborn Gleets, Seminal Effuſions, Involuntary Emiſſions, exceſſive Nocturnal Pollutions, or any Weakneſs of the Kidneys, Ureters, or Bladder, the Diabetes, Incontinency of Urine, or Difficulty of holding their Water, would doubtleſs be glad to meet with a certain, ſafe, and ſpeedy Cure, which they moſt aſſuredly may, by taking only a ſmall Quantity of a tranſcendent Balsamick Reſtaictive Electuary, now publiſhed for a general Good, after having for many Years been experienc'd never once to fail perfectly curing the moſt Stubborn Gleets known, in a few Days, without Difficulty or Trouble; as alſo all other Weakneſſes of the Back, Reins, Seminal Veſſels, and Urinary Paſſages, whichit almoſt inſtantly cures, bringing to rights and reſtoring all thoſe Parts and Paſſages to their natural Tone and priſtine Vigour, in a very extraordinary Manner, and by taking a few Doſes of it only.

This tranſcendent Balsamick Reſtaictive Electuary is neither diſagreeable to take, nor occaſions the leaſt Diſorder, but is a wonderful Reſtorative in all Weakneſs and Diſorder of Conſtitution of any Kind, and particularly ſtrengthens the Back, Reins, Seminal and Urinary Veſſels to an immenſe Degree, inſomuch that in any Debility of them, one Dole of it does more than ten of any other Remedy yet found out; and all Perſons fatigu'd with Gleets or Seminal Weakneſſes of any Sort, or Weakneſſes of the Urinary Veſſels, who take it, will in three Days time find it ſo very effectual, that they will be moſt agreeably ſurpriſed at it.

When a Medicine will infallibly accompliſh ſuch a ſpeedy and perfect Cure of ſuch difficult Maladies, as Gleets and Seminal Weakneſſes are, as this Great Remedy truly and directly will, even after all other Means and Medicines have been tried in vain; too much cannot be ſaid in it, and All who ever took it for any of the above-mention'd Purpoſes have readily declared.

The Price is but 6 s. a Pot, altho' for its abſolute Excellency one Pot alone being ſufficient in moſt Caſes to accompliſh a Cure, worth ten times as much, and by the Author's ſpecial Appointment, is to be had only at Mr. Radford's Toy-ſhop, at the Roſe and Crown againſt St. Clement's Church-Yard in the Strand, ready ſealed up, with a Book of Inſtructions, which whomſoever carefully reads will preſently know, when the Gleet or Weakneſs he is afflicted with ſucceeds a Venereal Injury, whether all the Malignity of the Foul Diſeaſe is intirely eradicated or not.

Note, Ask only for a 6 s. Pot of Balſamick Electuary.
